<b>F. INFORMATION BLOCKING</b>
--------------------------------

Starting April 5, 2021, in response to the 21<sup>st</sup> Century Cures Act, you will have the right to have electronic access to your health record as soon as it is available, upon request. Based on the 21<sup>st</sup> Century Cures Act, failure to provide access will constitute as information blocking.

**What is Information Blocking?**

Information blocking is defined in the 21<sup>st</sup> Century Cures Act. In summary, information blocking is “a practice that...is likely to interfere with, prevent, or materially discourage access, exchange, or use of electronic health information,” unless such practice is required by law (e.g., HIPAA), or it meets an exception established through federal rulemaking (42 U.S.C. § 300jj-52(a)(1)).

**What Electronic Health Information (EHI) is available to patients upon request?**

Starting on 4/5/21 the EHI definition is limited to data elements represented in United States Core Data for Interoperability v1 (USCDI) which is a standardized set of health data classes and elements used to send and receive electronic health information (EHI) and include the following categories of data:

- Allergies and intolerances
- Assessment and plan of treatment
- Care team members
- Clinical Notes
- Goals
- Health Concerns
- Immunizations
- Laboratory
- Medications
- Patient Demographics
- Problems
- Procedures
- Provenance
- Smoking Status

- Unique Device Identifier(s) for a Patient’s implantable Device(s)
- Vital Signs

Please note, there are circumstances when the provider cannot fulfill your request and these circumstances cannot be considered information blocking. There are five exceptions for not fulfilling information. *Please see the Information Blocking Exceptions section for more information.*

Exceptions for not fulfilling information:

- Preventing Harm - Blocking information is justified when it is in the public interest to protect a patient and other person against unreasonable risks of harm
- Privacy - This exception recognizes that if an actor is permitted to provide access, exchange or use of EHI under a privacy law, then the actor should provide that access, exchange or use. However, an actor should not be required to use or disclose EHI in a way that is prohibited under state or federal privacy laws.
- Security - This exception is intended to cover all legitimate security practices by actors but does not prescribe a maximum level of security or dictate a one-size-fits-all approach.
- Health IT Performance - This exception recognizes the need for health IT to be taken offline for system maintenance and improvements.
- Infeasibility - This exception recognizes practical challenges to comply with a request for EHI.

Also, the information blocking rule does not supersede the HIPAA privacy and security rules. It is not a requirement of the rule to release all confidential information available to patients (or their guardians).

<b>G. SPECIAL RULES REGARDING THE DISCLOSURE OF MENTAL HEALTH CONDITIONS, SUBSTANCE ABUSE, AND HIV-RELATED INFORMATION.</b>
---

For uses and disclosures of your protected health information related to care for mental health conditions, substance abuse, or HIV-related information, special restrictions may apply. For example, we generally may not disclose this specially protected information in response to a subpoena, warrant or other legal process unless you sign a special authorization or if a court orders the disclosure.

**1. Mental Health Information:**

If needed for your diagnosis or treatment in a mental health program, mental health information may be disclosed as needed between your treatment team members, and very limited information may be disclosed for payment purposes. Otherwise mental health information may **not** be disclosed without your authorization, except as specifically permitted by state or federal law.

**2. HIV-related Information:**

HIV-related information will not be disclosed, except under limited circumstances set forth under state or federal law, without your specific written authorization.

**3. Substance Abuse Treatment:**

If you are treated in a substance abuse program, information which could identify you as alcohol or drug-dependant will not be disclosed without your specific authorization except for purposes of treatment or payment or when specifically required or allowed under state or federal law.
